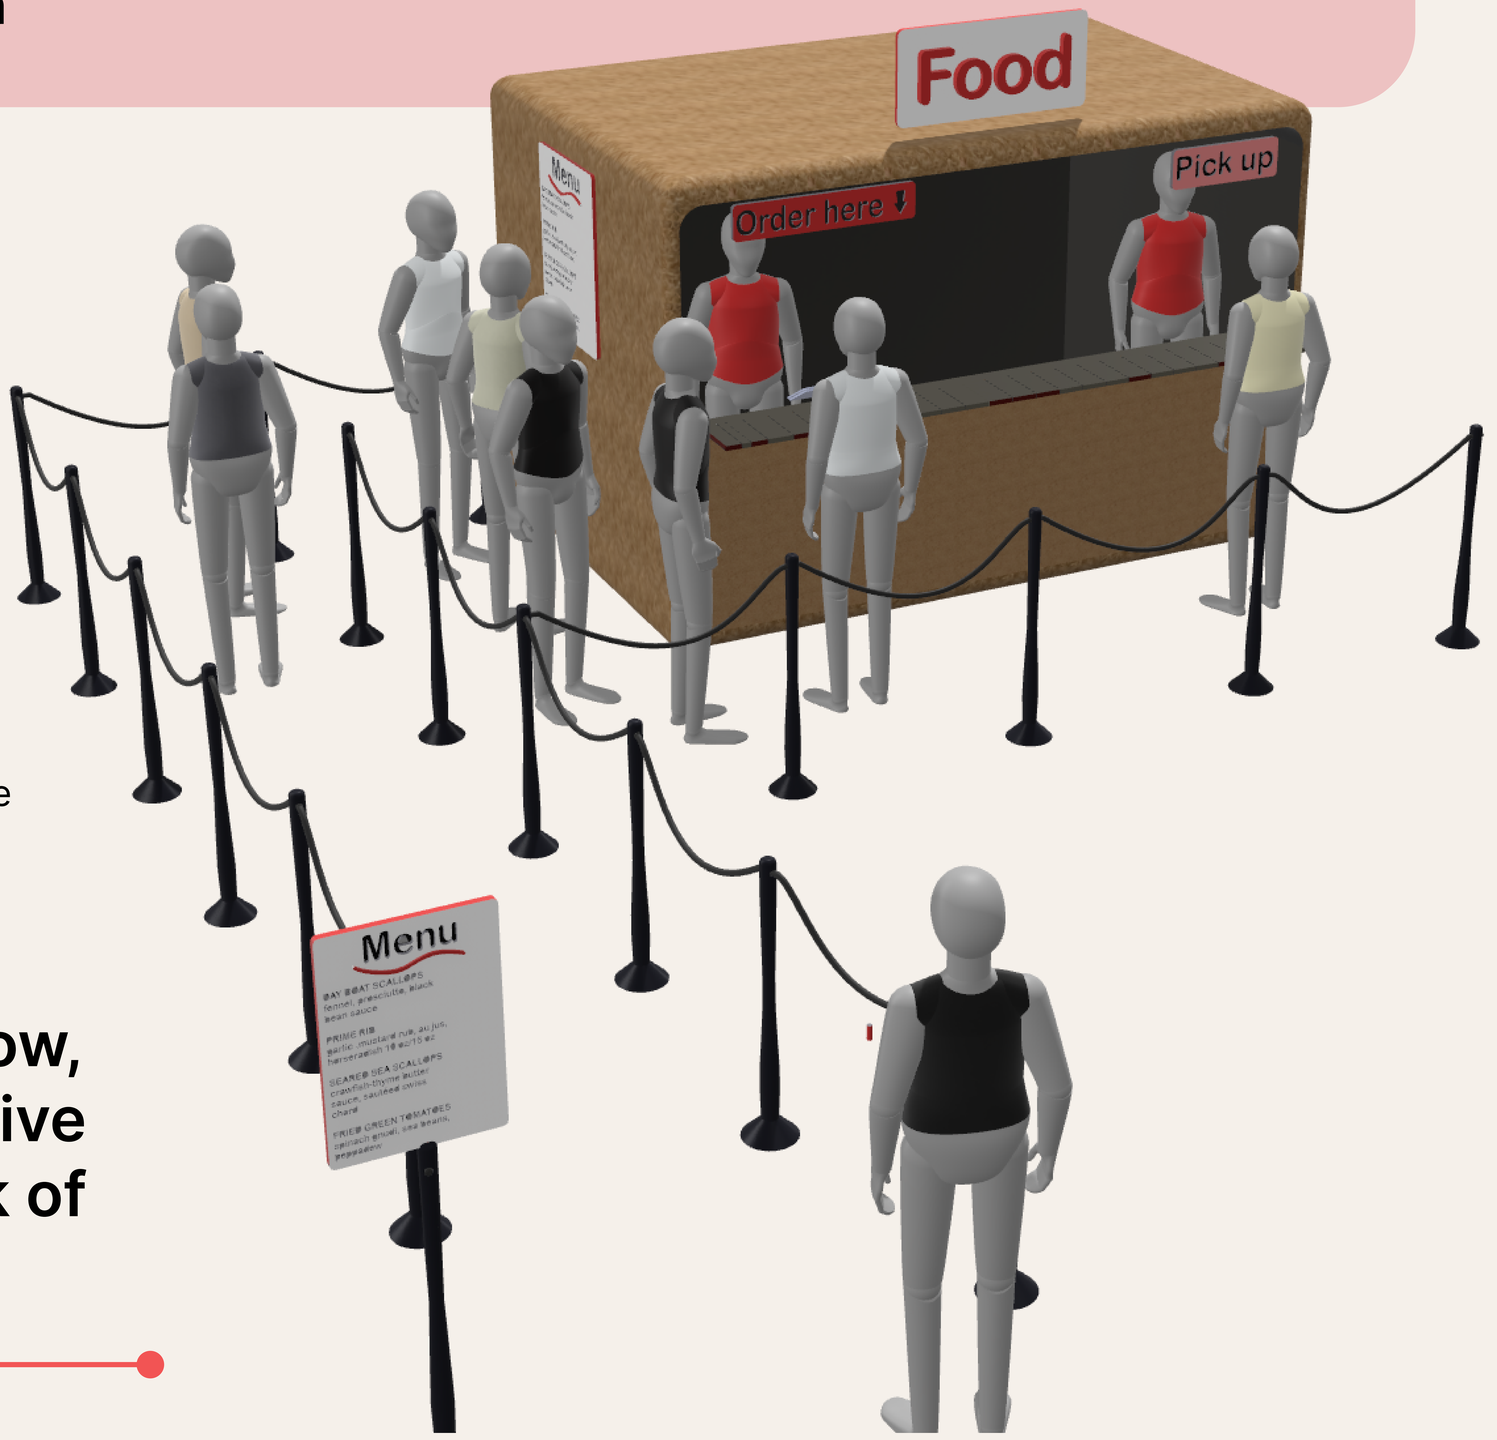
PROBLEM STATEMENT

Mental overwhelm caused by picking what to eat and which line to stand in

TARGET GROUP

People with generalised anxiety disorder

Menu located in the sides and front of the stall



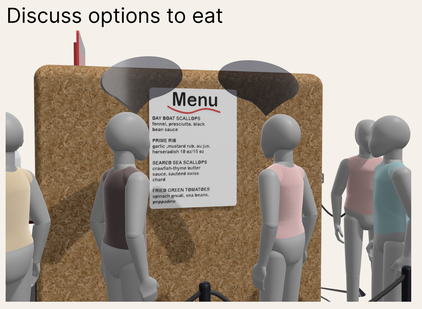
Prioritizes a guided, stress-free flow, ensuring a comfortable and inclusive experience that minimizes the risk of overwhelm.

Decide what to eat

Wait in line

Look at the menu

Discuss options to eat



Get to counter and order

Pick up food

PROs

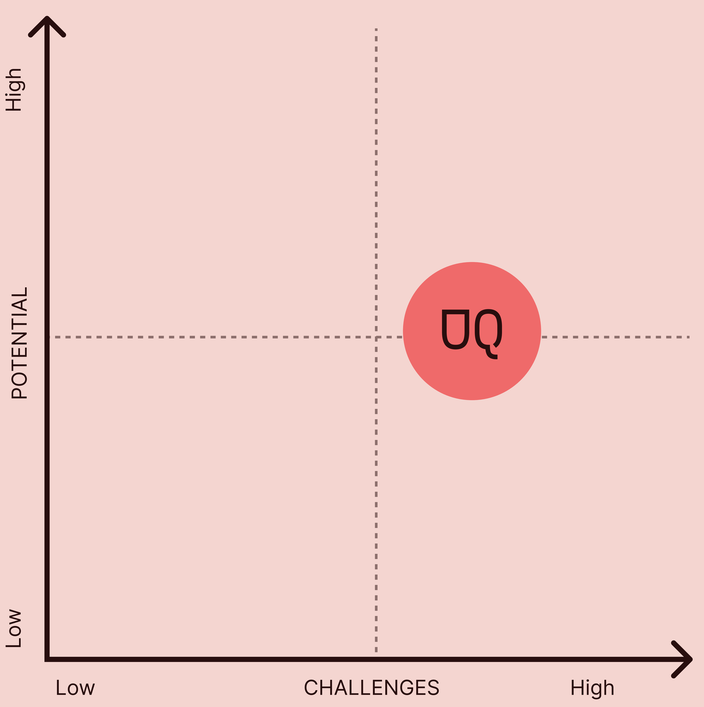
- Improves ordering process
- Quick overview of ques
- Reduce triggers in ques
- Reduce congestion
- Flexible

CONs

- Takes up more space
- Will require more time to set up foodstalls
- Risk of people tripping

MAKING RF MORE INCLUSIVE

- Creates a more predictable and manageable environment
- Helps with crowd control in busy areas
- Reduce stressful triggers
- Provides an overview of the menu before entering a que
- Also targets helps visual impaired festival-goers
- Several places for menu avoids gathering of larger groups



Potential:

- Solves the problem effectively
- Low cost of implementation

Challenge:

- Very feasible solution with respect to price and time
- Few external risks and competition
